

NCRAMS-2K16-NATIONAL CONFERENCE ON RECENT ADVANCEMENT IN MECHANICAL SCIENCES

The Department of Mechanical Engineering of ST.PETER'S INSTITUTE OF HIGHER EDUCATION AND RESEARCH, ST. PETER'S UNIVERSITY is proudly presenting "NCRAMS 2K16", National Conference on , "Recent Advances in Mechanical Sciences" on March 30th 2016. This Conference has brought up a new standard then brings out new ideas to face the new challenges set before to us in this ever demanding world and a lightening approach to the Department of Faculties and Students / Scholars.

Dr.S.Venugopal, Scientist And Director, IGCAR, Chennai inaugurated the conference, persons with sound Industrial backgrounds have took part in the conference and gave more idealistic speech ,which would have given high level of confidence to the Students / Scholars, who were participated and presented their papers. Two Professors Dr.M.Jayaraman, Assistant General Manager plastics Moulding PVT LTD, Guindy, Dr.R.Selvakumar, HAS Engineering PVT LTD, Ekkaduthangal delivered there key note speech on Emerging trends in information, communication and computing.

National Conference has a strong foundation for the growth of new ideas in emerging technology in mechanical engineering to create better tomorrow. This National Conference has brought up recognized that the new methodologies and application to approach the technical professional area need to be strengthened knowledge and trying to broadcast revolutionary methods and will contribute the creative thinking and lively discussion on modern trends so as to meet the demands of the society in the Quest for the enrichment of technology approach to the Department Faculties and Students/ Scholars. The Mechanical Department of our college is contribution of highly skilled human resources which produce qualitative world class Technical Engineering Professionals. This Technical convergence will definitely make the contemporaries to have open face to face discussion for widening their technical skills.

It gives us great honour in bringing out the proceedings “ETERNITY” to commemorate this grand occasion the name “ETERNITY” is the epitome of Endless Learning process this souvenir compresses of compilation from the various papers presented at the “NCRAMS 2K16”, and over view about the Department of Mechanical Engineering and paper works contributed by the staffs’ and the students’ some which bring out the lighter side of life and engineering. “NCRAMS 2K16”, has been a domain of engineering for centuries old. The entire globe has passionately delivered into making milestones in manufacturing technology and hence it poses a high voltage challenge before us how to get into tandem in India as well.
